Focus Group Discussion (FGD) Guide

A. Knowledge and Conceptual Understanding of SMA

Main Question: How has your understanding of social media algorithms developed as a result of the professional development programme?

Probes

- What key concepts or ideas about social media algorithms did you learn or better understand?
- How confident are you in explaining how social media algorithms work to your students?
- To what extent do you feel the training addressed misconceptions or gaps in your prior knowledge?
- How relevant and applicable is this knowledge to your subject area or teaching context?

B. Inclusive SMA Teaching Skills: TPACK and UDL Integration

Main Question: In what ways has the programme influenced your ability to design and deliver inclusive SMA lessons?

Probes

- Can you describe how you would apply UDL principles to teach SMA concepts to learners with diverse needs?
- How has your approach to lesson planning or instructional strategies changed following the training?
- What technological tools or strategies would you use to support students' understanding of SMA concepts?
- How prepared do you feel to integrate SMA content across different subjects or learning areas?
- How would you adapt SMA instruction for students with varying levels of digital literacy, language proficiency, or learning preferences?

C. Attitudes Toward SMA Teaching

Main Question: What are your views and feelings about teaching social media algorithms after participating in the programme?

Probes

- How has the training influenced your willingness or motivation to teach SMA concepts?
- What aspects of SMA teaching do you find most valuable or meaningful for students?
- Do you perceive SMA as an important component of the K–12 curriculum? Why or why not?
- How comfortable do you feel incorporating SMA topics into your regular teaching practice?

D. Anticipated Challenges and Implementation Considerations

Main Question: What challenges do you anticipate when implementing inclusive SMA teaching practices in your classroom?

Probes

- How might access to digital devices, internet connectivity, or platforms affect your implementation?

- Are there areas where you still feel limited in your knowledge or skills related to SMA or technology integration?
- What challenges do you foresee in creating or accessing appropriate instructional materials for inclusive SMA teaching?
- How might classroom factors such as large class sizes or diverse learning needs influence your approach?
- What forms of institutional or administrative support would be necessary to facilitate effective implementation?
- How could time constraints within the curriculum affect your ability to teach SMA concepts effectively?
