SMA Teaching Attitude Scale (SMATAS) – Adapted from (Yılmaz et al., 2025)

Instructions

Please indicate the extent to which you agree or disagree with each statement by ticking one response.

Response	Meaning
1	Strongly Disagree
2	Disagree
3	Neutral
4	Agree
5	Strongly Agree

Section A: Negative Attitude (Resistance Orientation)

NO.	STATEMENT	1	2	3	4	5
A1	Teaching social media algorithms is too complex for most K-12 students to understand.	☐	☐	☐	☐	☐
A2	I feel hesitant about incorporating social media algorithm topics into my teaching.	☐	☐	☐	☐	☐
A3	Teaching social media algorithms would take valuable time away from other important subjects.	☐	☐	☐	☐	☐
A4	Including examples of social media algorithms in lessons may disadvantage students with diverse learning needs.	☐	☐	☐	☐	☐
A5	Social media algorithms should only be taught by computer science or ICT teachers.	☐	☐	☐	☐	☐
A6	Teaching social media algorithms would increase my workload without offering meaningful benefits to students.	☐	☐	☐	☐	☐
A7	Integrating social media algorithm topics into the curriculum would confuse students rather than support their learning.	☐	☐	☐	☐	☐

Note: Items A1–A7 are going to be reverse-coded during data analysis.

Section B: Positive Attitude (Openness and Professional Willingness)

NO.	STATEMENT	1	2	3	4	5
B1	Understanding social media algorithms helps students make informed and ethical decisions online.	☐	☐	☐	☐	☐
B2	Teaching social media algorithms makes learning more relevant to students' digital experiences.	☐	☐	☐	☐	☐
B3	Learning about social media algorithms strengthens students' digital literacy and critical-thinking skills.	☐	☐	☐	☐	☐

B4	Social media algorithms should be included across subjects within the K–12 curriculum.	☐	☐	☐	☐	☐
B5	I am motivated to further develop my knowledge and skills related to teaching social media algorithms.	☐	☐	☐	☐	☐
B6	Professional development on teaching social media algorithms is valuable for teachers.	☐	☐	☐	☐	☐
B7	Using technological tools, such as visualisations or simulations, to demonstrate algorithms enhances students' understanding.	☐	☐	☐	☐	☐
B8	Teaching social media algorithms through TPACK and UDL principles can promote inclusive and equitable learning.	☐	☐	☐	☐	☐
